

Going for a Covid-19 vaccination

There is a virus called Coronavirus 

I will need to be protected against the virus 

Injections can help to keep us safe! 

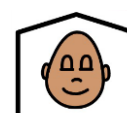

The person giving the injection will be dressed up to protect them from germs 

They will be wearing an apron, gloves, mask and face shield 

Lots of people will need to injection so I may have to wait a little while 

The person who is dressed up will put an injection in my arm! 

I can't see the person's face, but they are kind and they are smiling 

The person giving the injection is helping to keep me safe and well 

This might not feel very nice, but it will be finished very quickly 

My grown up will look after me
