

Going for a Covid-19 test

There is a virus called Coronavirus

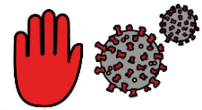

I may need to be tested for the virus

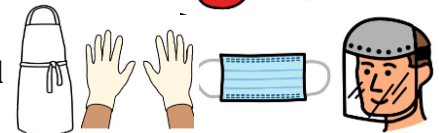

This is to keep me safe; and others around me safe

The person doing the test will be dressed up to protect them from germs

They will be wearing an apron, gloves, mask and a face shield

Lots of people will need the test so I may need to wait a little while

The person testing me will use a swab

They will swab my throat

They will swab my nose

This might not feel very nice, but it will be finished very quickly

I will stay at home until my test results come back

I will keep washing my hands

My grown up will look after me and keep me safe
